

▶ Look around...

Marco is building Turf.

i design things.

i think design can change things.

i think the things we design are just as important as the things we choose not to.

i think we should design things that do the things we don't enjoy, and make the things we do enjoy, even better.

i think there are too many things.

i think there should be fewer, but better things*.

the best things. an optimal amount.

* Less, but better.
